

TURBOCHARGE YOUR CRUSHERS

Imagine the possibilities if you could increase your cone crusher's capacity by up to 20%

Introducing "Turbocharge" kits for Symons™ cone crushers

The engineering expertise of Innotech Solutions has resulted in the development of the "Turbocharge" kits for the Symons cone crushers that can be easily installed to increase the tonnages of the salable products.

The Symons crushers have an excellent track record of ruggedness and reliability but, now the "Turbocharge" kits give you the ability to "Turbocharge" your performance which results in higher profitability!

Short Head Model

Benefits

- Apply more horsepower and get up to 20% more yield
- Variable speed capabilities to optimize performance
- Improved product shape
- Make finer product(s) and /or increase tonnage
- Return of Your Investment in less than 6 months

Innotech Solutions has become the standard by which all others are compared!

Symons is a registered trademark of Metso Minerals Inc.
